

Upgrading Cradle Firmware

Requires: Windows PC (10 or 11), USB cable (USB-C to USB-C or USB-A to USB-C), and KDC firmware application.

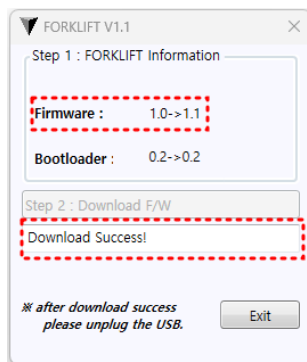

1. Disconnect the USB-C cable that connects the cradle to the PC.

2. Unzip the folder "FORKLIFT_V11_Rev02.zip" and then open the upgrade application "FORKLIFT_V11_Rev02.exe"

3. With the program running, connect the USB-C cable to the cradle.
4. The program automatically recognizes the cradle and updates the firmware. Download time takes approximately 15 seconds. Once complete, check the **firmware version** and **Download Success!**

Only one download program ("FORKLIFT_V11_Rev02.exe") must be running to automatically download.
