Extended Battery KDC470/475 and SKX Companion

MORE Power in the Palm of Your Hand

Whether you're scanning in the field, warehouse, or on a store floor, a low battery indication immediately results in lost productivity. The Extended Battery Companion helps ensure your battery indicator stays full through the longest shift.

Extra Battery Life

There's no need to charge batteries when going from shift to shift or in the middle of a very long one. The extra capacity provided by the Extended Battery Companion will help your smart device stay powered all day on a single charge.

Rechargeable

The internal batteries of the KDC, host device, and Extended Battery Companion are rechargeable. Your KDC and Extended Battery will charge simultaneously when charging via Micro USB or 1-slot/4-slot Charging Cradles. Use a SmartSled Custom Case or a Universe Case Adaptor and your device's battery will charge, too. Your SKX host device and External battery will charge when connected via USB-C or 1-slot/5-slot SKX Charging Cradles.

LED Indicators

Eliminating the guesswork, easy-to-see LED indicators located on the back of the battery let you know the status of your extended battery with a quick glance.

Rugged for Tough Conditions

The KDC, SKX, and Extended Battery Companion achieve at least an IP65 rating—meaning they're dust tight and water resistant. Plus, they all can handle a 5' drop.

Comfortable in Your Hand

The Extended Battery Companion was designed for maximum comfortability when held. The slim profile and light weight keep the full sled from feeling bulky even with the extra power.

Secured

A heavy-duty and adjustable elastic strap connects directly to the battery via a metal ring helping to eliminate accidental drops. The battery fits flush against the KDC or SKX and is attached by four screws to ensure no movement or slippage.

Extended Battery Companion Details

LED Indicator

When charging:

RED: Low Battery

ORANGE: Charging

GREEN: Fully Charged

When discharging:

BLINKING RED: Low Battery

BLINKING ORANGE: Discharging

BLINKING GREEN: Fully Charged
