**KoamTac Introduces Revolutionary IP65-rated [Bluetooth Barcode Scanner](#)
with NFC and GPS options for Smartphones and Tablets**

PRINCETON, NJ, January 9, 2013 – KoamTac, Inc. (http://www.koamtac.com/)
today announced the release of the KDC350, which features added durability
and keypad convenience, the newest in the company's line of innovative,
programmable Bluetooth barcode scanners and card readers that are changing
the way the world collects and stores information.

The KDC350 has an IP65-rated design that allows users to collect information in
dusty and wet environments. The compact keypad adds convenience to data
entry enhancements. NFC (Near Field Communication) and GPS options further
enhance the traditional data collection applications.

"I've had many conversations over the last few years with leaders in various
industries who gave me a wish list of their needs, so I designed the KDC350
based on their feedback." said Dr. Hanjin Lee, KoamTac's CEO and president.

"The KDC350 is the result of a natural evolution in the KDC series, combining the
best features of the entire KDC line to date, but with new features that once
again prove KoamTac's position as an innovation leader in the [barcode scanner](#)
and card reader industry."

The KDC350 also comes with an anti-microbial case, ideal for environments such
as healthcare, as well as a switch to put it in vibrate mode, ideal for noisy
environments.

"We are pleased that the KDC350 will broaden the range of our products to meet
the specific needs of industries that require added durability and keyboard
functionality with their scanning needs," said Dr. Lee. "At KoamTac, we are
dedicated to providing smart accessories for smartphones and tablets to help
companies save time and money and increase productivity."

About KoamTac, Inc.:

KoamTac, based in Princeton, New Jersey, produces a signature line of
lightweight, ergonomically-friendly Bluetooth barcode scanners and card readers
that are universally compatible across today's technology platforms, working
seamlessly with Android, Blackberry, iPhone/iPod touch/iPad, Mac and Windows.

The KDC100, KDC200, KDC250, KDC300, KDC350 and KDC400 are the world's smallest and lightest programmable barcode scanners and card readers with a display on the market today. For additional information, go to www.koamtac.com.
