Barcode/RFID/mPOS SmartSled

► Our Most Modular Product Yet ►

Whether you need to read barcodes or RFID tags this is the KDC for you. The KDC470 and KDC475 are rugged devices with an IP65 rating and are built to last. No matter what type of data you need to collect or how you need to collect it, there is a companion module to get the job done quickly and accurately. Charge your device with our unique charging cases and never miss a minute of productivity.

Attach to **ANY** Smartphone or Tablet

The KDC470 and KDC475 can be attached to any smart device via a custom case to create a sled scanning solution. This unique modular design allows you to upgrade your smart device without worrying about replacing the entire scanning solution. Your investment in a KDC is protected regardless of upgrades in smartphone and tablet technology.

Barcode Reading

At their base, the KDC470 and KDC475 are superior barcode scanners. Both the KDC470 and KDC475 are available in various models: 1D Laser, 1D CCD, and 2D Imager, so you can read a variety of barcodes in any industry. The KDC475 offers downward angled scan engines, allowing you to hold your device at level while scanning barcodes at a lower height. The KDC connects via Bluetooth Classic or Bluetooth Low Energy (BLE) for easy pairing and data transfers.

RFID Companions

The RFID companions attach directly to your KDC creating a contactless radio frequency identification reader. The interface can be utilized for asset management and tracking whether those assets are people, animals, or inanimate objects. Options include High Frequency (HF), 0.5W Ultra High Frequency (UHF), or 1.0W UHF.

Additional Companions

- Extended Battery Pack - For long shifts or projects. Never worry about the battery of your KDC or smart device.
- Pistol Grip - Pull the trigger for easy scanning.
