Extended Battery SKX Companion

MORE Power in the Palm of Your Hand

Whether you're scanning in a field, warehouse, or on a store floor, a low battery indication immediately results in lost productivity. The Extended Battery Companion helps ensure your battery indicator stays full through the longest shift.

Extra Battery Life

There's no need to charge batteries when going from shift to shift or in the middle of a very long one. The extra capacity provided by the Extended Battery Companion will help you stay powered all day on a single charge.

Rechargeable

The Samsung Galaxy device's battery and the Extended Battery Companion use rechargeable batteries. Both batteries charge simultaneously when connected and charging via USB-C or Charging Cradle. 1-Slot and 5-Slot Charging Cradles are available for safe and efficient charging of the Extended Battery and your Samsung Galaxy device with SKX SmartSled.

LED Indicators

Eliminating the guesswork, easy-to-see LED indicators located on the back of the battery let you know the status of your extended battery with a quick glance.

Rugged for Tough Conditions

The SKX SmartSled and Extended Battery Companion are dust tight and water resistant. Plus, they can handle a 5' drop.

Comfortable in Your Hand

The Extended Battery Companion, like all SKX Companions, was designed to ensure maximum comfortability in your hand. The slim profile and light weight keep the full sled from feeling bulky even with the extra power.

Secured

A heavy-duty and adjustable elastic strap connects directly to the battery via a metal ring helping to eliminate accidental drops. The battery fits flush against the SKX SmartSled and is attached by four screws to ensure no movement or slippage.

Extended Battery Companion Details

LED Indicator

When charging:

RED: Low Battery

ORANGE: Charging

GREEN: Fully Charged

When discharging:

BLINKING RED: Low Battery
